

**Evaluation: 158 Questions**

Name: \_\_\_\_\_

**Important Instructions**

1. Read all the instructions and both sides of all pages.
  2. Manage your time when answering questions on this test.
- Answer the questions you know, first.

**Multiple Choice - 158 Questions**

This is a practice test containing many practice questions. The real test will contain many questions similar to these. Knowing the concepts behind the questions is necessary; memorizing these answers won't help.

The real test will have approximately one question per minute. The real test may have some questions unlike anything given here.

(Office use only: 22 93 43 4 7 47 82 117 51 101 66 102 138 78 45 89 36 94 124 44 148 139 119 46 29 127 2 90 35 64 27 108 24 61 72 154 149

1. If variable **foo** might contain nothing (a null value - defined but empty), which **bash** command sequence correctly tests for this and prints **OK**?
  - a. **if [ ''\$foo'' = '()' ; then echo OK ; fi**
  - b. **if [ \$foo -eq : ] ; then echo OK ; fi**
  - c. **if [ "\$foo" = \* ] ; then echo OK ; fi**
  - d. **if [ \$foo -eq "" ] ; then echo OK ; fi**
  - e. **if [ "\$foo" = "" ] ; then echo OK ; fi**
2. How many arguments and options are there to the command:  
**sort -r <infile**
  - a. Two arguments, neither of which is an option.
  - b. One command line argument containing one option name.
  - c. A file name starting with a dash and an **<infile** switch option argument.
  - d. Two arguments, one of which is a single option name and the other is a pathname.
  - e. Three arguments, one of which contains an option and one is a pathname.
3. If **x=8** and **y=9** then which of the following **bash** command lines outputs only the word **foobar** (and nothing else)?
  - a. **[ x -ne y ] && echo foobar**
  - b. **[x!=x] || echo foobar**
  - c. **[ x = x ] && echo foobar**
  - d. **[!x = y] && echo foobar**
  - e. **[x -ne y] || echo foobar**

4. Which **bash** command sequence correctly searches for the string **foo** and then prints **YES** if it is found inside the group file?
  - a. **if [ test foo /etc/group ] ; then echo YES ; fi**
  - b. **if test foo /etc/group ; then echo YES ; fi**
  - c. **if grep foo /etc/group ; then echo YES ; fi**
  - d. **if test foo = /etc/group ; then echo YES ; fi**
  - e. **if [ grep foo /etc/group ] ; then echo YES ; fi**
5. If **a=9** and **b=9**, which **bash** command sequence correctly compares the two numbers as equal and prints **OK**?
  - a. **if [ \$a -eq \$b ] ; then echo OK ; fi**
  - b. **if [ \$a==\$b ] ; then echo OK ; fi**
  - c. **if ( a == b ) ; then echo OK ; fi**
  - d. **if [ a = b ] ; then echo OK ; fi**
  - e. **if test a -eq b ; then echo OK ; fi**
6. What is the output of the following sequence of **bash** commands:  
**echo hi >wc ; wc wc >hi ; cat hi**
  - a. **1 1 3 wc**
  - b. **0 0 0 wc**
  - c. **no output**
  - d. **1 1 2 wc**
  - e. **hi**
7. What is the **bash** shell output of this two-command sequence if run in a directory containing 123 files with names that are all the numbers from **1** to **123** inclusive: **glob="\*"; echo "\$glob"**
  - a. **\***
  - b. **\$glob**
  - c. **the file names 1 through 123, surrounded by quotes**
  - d. **"\$glob"**
  - e. **the file names 1 through 123**
8. If **foo** is a script containing the line **TERM=new ; export TERM**, what is the output of the following sequence of **bash** commands that use **foo**:  
**TERM=bar ; ./foo ; echo \$TERM**
  - a. **bar**
  - b. **new**
  - c. **\$TERM**
  - d. **foo**
  - e. **TERM**

9. What is the link count of file **foo** after this set of successful commands?

```
rm foo ; touch foo ; ln foo bar
cp bar x ; ln x y ; ln bar z
```

- a. 3
- b. 1
- c. 4
- d. 2
- e. 5

10. What is the output of this sequence of three shell commands:

```
umask 762 ; touch newfile ; ls -l newfile
```

- a. -----wx 1 me me 0 Oct 1 1:12 newfile
- b. -rw-rw--w- 1 me me 0 Oct 1 1:12 newfile
- c. -----xr-x 1 me me 0 Oct 1 1:12 newfile
- d. -rwxrwx--w- 1 me me 0 Oct 1 1:12 newfile
- e. -----r-- 1 me me 0 Oct 1 1:12 newfile

11. What is the output of the following sequence of **bash** commands:

```
a=cow ; b=dog ; touch $a ; test -z $a ; echo $?
```

- a. the number 1 or 0 followed by another 1 or 0 on a new line
- b. 1
- c. **test: \$a: integer expression expected**
- d. no output
- e. 0

12. What is the **bash** shell output of this two command sequence:

```
PATH=/bin/ls:/bin/cat:/bin/sh ; cat nosuchfile
```

- a. **ls: /bin/cat: command not found**
- b. **bash: /bin/sh: No such file or directory**
- c. **bash: cat: command not found**
- d. **bash: /bin/ls: command not found**
- e. **cat: nosuchfile: No such file or directory**

13. Given this long listing:

```
drwxr-xr-x 448 me me 296 Dec 4 9:12 /dir
```

How many subdirectories lie immediately under **/dir**?

- a. 448
- b. there is not enough information shown to answer the question
- c. 446
- d. 296
- e. 294

14. What is in the file named **file** after this command sequence:

```
echo a >c ; echo b >>c ; mv c d >file
```

- a. no such file (nonexistent file)
- b. **a**
- c. nothing - **file** is empty - no data
- d. **b**
- e. **a** followed by **b**

15. What is the output of the following sequence of **bash** commands:

```
echo wc >wc ; wc wc >wc ; sort wc
```

- a. **wc**
- b. 1 1 2 **wc**
- c. 1 1 3 **wc**
- d. 0 0 0 **wc**
- e. no output

16. A shell script named **foo** is executed as follows:

```
./foo 1 "2 3 4" 5
```

Inside the script is the line: **echo "\$2"**

What is the output from this line?

- a. 2 3 4
- b. **\$2**
- c. "2 3 4"
- d. "2
- e. 2

17. Which **bash** command line below allows programs in the current directory to execute without preceding the names with **./**?

- a. **\$PATH=/bin:./\$HOME**
- b. **PATH = /bin:\$HOME:.**
- c. **PATH=/bin:\$HOME:.**
- d. **\$PATH=.:\$HOME:/bin**
- e. **PATH = ./\$HOME:/bin**

18. How many arguments and options are there to the command:

```
ls -lid /p
```

- a. Two arguments, one of which is a single option name and the other is a pathname.
- b. Two arguments: A file name starting with a dash and a **/p** switch option argument.
- c. Two arguments, neither of which is an option.
- d. Three arguments, one of which contains options and one is a pathname.
- e. Two command line arguments, one of which contains three options.

19. Given the following **bash** shell command line: **read a b c**, which user keyboard input line below will assign the text **b** to the shell variable named **b**?
- a,b,c**
  - a=a b=b c=c**
  - a;b;c**
  - a b c**
  - a:b:c**
20. What is the output of the following sequence of **bash** commands:  
**echo wc >wc ; wc wc >wc ; cat wc**
- 0 0 0 wc**
  - no output
  - 1 1 3 wc**
  - 1 1 2 wc**
  - wc**
21. Which of these first lines will cause this executable file to be interpreted using the Bash shell?
- #!/bin/bash**
  - !/bin/bash**
  - /bin/bash -u**
  - #/bin/bash**
  - !#/bin/bash -u**
22. What is the output of the following sequence of **bash** commands:  
**wc='one two' ; test wc = wc**
- 0**
  - no output
  - 1 2 8 wc**
  - test: too many arguments**
  - 1**
23. How can you ask the **bash** shell to complete commands or file names for you?
- You can type the first part of the command or file name and press the **TAB** key.
  - You can type the first part of the command or file name and press the **ALT** key.
  - Type **[CONTROL]-[D]** and the shell will present a menu of commands.
  - Type **[CONTROL]-[ALT]-[DEL]** and the shell will present a menu of commands.
  - Type **[ALT]-[F2]** the shell will present a menu of commands.

24. What is the output of the following sequence of **bash** commands:  
**echo wc >wc ; wc wc >wc ; head wc**
- 1 1 2 wc**
  - wc**
  - 1 1 3 wc**
  - 0 0 0 wc**
  - no output
25. If **a=cow** and **b=dog** then what is the output of the following sequence of **bash** commands: **[ \$a = cow -a \$b = cow ] ; echo \$?**
- test: \$a: integer expression expected**
  - no output
  - 1**
  - 0**
  - the number 1 or 0 followed by another 1 or 0 on a new line
26. Which **bash** command sequence below always outputs just the date only if the first argument is either readable or executable?
- if [ -r -o -x "\$1" ]; then date ; fi**
  - if [ "-r \$1" || "-x \$1" ]; then date ; fi**
  - if [ "\$1" -eq -r -o "\$1" -eq -x ]; then date ; fi**
  - if [ -r || -x "\$1" ]; then date ; fi**
  - if [ -r "\$1" -o -x "\$1" ]; then date ; fi**
27. Which **bash** command sequence correctly searches for the **chars** and then prints **OK** if it is found inside the password file?
- if [ grep chars /etc/passwd ] ; then echo OK ; fi**
  - if grep chars </etc/passwd ; then echo OK ; fi**
  - if [ test chars /etc/passwd ] ; then echo OK ; fi**
  - if test chars /etc/passwd ; then echo OK ; fi**
  - if test chars = /etc/passwd ; then echo OK ; fi**
28. A shell script named **foo** is executed as follows:  
**./foo 1 2 "3 4" 5**  
Inside the script is the line: **echo "\$3"**  
What is the output from this line?
- 2 3 4**
  - "3**
  - 1 2 3**
  - \$3**
  - 3 4**

29. If **a=cow** and **b=dog** then what is the output of the following sequence of **bash** commands: **if \$a = \$b ; then echo \$a ; fi**
- test: \$a: integer expression expected**
  - bash: cow: command not found**
  - no output**
  - test: cow: integer expression expected**
  - cow**
30. Given my directory **dir** and my file **dir/foo** owned by me, which permissions allow me to delete the file **dir/foo** from the directory, but not change the content (data) in the file?
- Permissions 300 on directory **dir** and 500 on file **dir/foo**.
  - Permissions 500 on directory **dir** and 400 on file **dir/foo**.
  - Permissions 100 on directory **dir** and 200 on file **dir/foo**.
  - Permissions 300 on directory **dir** and 300 on file **dir/foo**.
  - Permissions 100 on directory **dir** and 100 on file **dir/foo**.
31. If my current working directory is **/home**, and my home directory is **/home/xx**, which of the following commands copies the Unix password file into my home directory under the name **foo**?
- cp xx/.../etc/passwd ../home/xx/foo**
  - cp .../.../etc/passwd /xx/foo**
  - cp xx/.../../etc/passwd xx/foo**
  - cp ../home/xx/.../etc/passwd ./xx./foo**
  - cp ../etc/passwd ../xx/foo**
32. What is the link count of directory **dir** after this set of successful commands? **mkdir dir ; cd dir ; touch one ; mkdir two**
- 3
  - 1
  - 4
  - 5
  - 2
33. If variable **mt** might contain nothing (a null value - defined but empty), which **bash** command sequence correctly tests for this and prints **OK**?
- if [ \$mt -eq "" ] ; then echo OK ; fi**
  - if [ \$mt -eq : ] ; then echo OK ; fi**
  - if [ "\$mt" = "" ] ; then echo OK ; fi**
  - if [ '\$\$mt' = '''' ] ; then echo OK ; fi**
  - if [ "\$mt" = \* ] ; then echo OK ; fi**

34. In an empty directory, what is the length of the longest file name created by the following **bash** shell two-command sequence:
- x='1 12 123 1234' ; touch '\$x'**
  - 3 characters
  - 13 characters
  - 1 character
  - 2 characters
  - 4 characters
35. What is the output of the following sequence of **bash** commands:
- a=1 ; b=2 ; test \$a -ge \$b ; echo \$?**
  - no output
  - the number 1 or 0 followed by another 1 or 0 on a new line
  - test: \$a: integer expression expected**
  - 0
  - 1
36. Which of the following VI/VIM key sequences will move the entire line on which the cursor resides to after the line that follows it (i.e. it would move line 5 to be line 6 and line 6 would become line 5)?
- ddP**
  - ddp**
  - DDp**
  - :dp**
  - DDP**
37. Which command sequence below does *not* generate an error message from the last command in the sequence?
- mkdir one one/two ; rmdir one/two**
  - date >foo ; cp foo/. bar**
  - cat /etc/passwd > mail idallen@ncf.ca**
  - mkdir foo ; ln foo bar**
  - mkdir foo foo/bar ; rmdir foo**
38. Which line below is most likely to be the beginning of an error message?
- echo 1<&2 "... "**
  - echo 2>\$1 "... "**
  - echo 2<\$1 "... "**
  - echo 1>&2 "... "**
  - echo 2>&1 "... "**

39. What is the link count of directory **dir** after this set of successful commands?  
`mkdir dir ; cd dir ; touch foo ; mkdir a b c`
- 4
  - 1
  - 3
  - 2
  - 5
40. If a **bash** shell script named **foo** contains the line:  
`if [ "$1" = '$2' ] ; then echo SAME ; fi`  
then which of the following command lines will produce **SAME** as output?
- `./foo bar bar`
  - `./foo "$1" '$2'`
  - `./foo '$2' bar`
  - `./foo "bar" 'bar'`
  - `./foo $2 $2`
41. In an empty directory, what is the shell output of these three commands:  
`touch .1 .2 .3 11 12 ; b='1* .2*' ; echo '$b'`
- `$b`
  - `.1* .2*`
  - `'.1* .2*'`
  - `11 .1 12 .2`
  - `.1 .2`
42. Which of the following shell command lines displays all the names in the current directory that are exactly three letters (alphabetic) long (and nothing else)?
- `echo [a,zA,Z][a,zA,Z][a,zA,Z]`
  - `echo [a-mn-zA-YZ][ab-zA-BY][za-yZA-Y]`
  - `echo [0-89][01-9][0-45-9]`
  - `echo ???`
  - `echo [azAZ][azAZ][azAZ]`
43. Which of these statements is true?
- If `/p` is an empty directory, `ls /p/*` produces an error message.
  - If `/q` is an empty directory, `echo /q/*` produces an error message.
  - Either single or double quotes will stop shell glob (wildcard) patterns from expanding.
  - The `ls dir` command looks up the directory argument **dir** in your **\$PATH**.
  - Typing `./script` and `bash script` always give identical results.

44. Which **bash** command sequence correctly compares the two numbers and prints **OK**?
- `if [ 4 -gt 3 ] ; then echo OK ; fi`
  - `if [ ! 4 <= 3 ] ; then echo OK ; fi`
  - `if [ 4 > 3 ] ; then echo OK ; fi`
  - `if [ 4 -gr 3 ] ; then echo OK ; fi`
  - `if ( ! 4 < 3 ) ; then echo OK ; fi`
45. What is the output of the following sequence of **bash** commands:  
`x=0 ; y=1 ; touch $x ; test ! -z $x ; echo $?`
- 1
  - test: \$x: integer expression expected**
  - 0
  - the number 1 or 0 followed by another 1 or 0 on a new line
  - no output
46. If a **bash** shell script named **foo** contains the line:  
`if [ '$1' = "$2" ] ; then echo SAME ; fi`  
then which of the following command lines will produce **SAME** as output?
- `./foo $1 $1`
  - `./foo 1 "$1"`
  - `./foo bar '$1'`
  - `./foo bar 'bar'`
  - `./foo 'bar' "bar"`
47. Which command line displays the contents of the Unix **passwd** file one page at a time?
- `less </etc/passwd`
  - `/etc/passwd >less`
  - `cat /etc/passwd >less`
  - `less | /etc/passwd`
  - `/etc/passwd | less`
48. How can you ask the **bash** (Linux) shell to complete commands or file names for you?
- You can type the first part of the command or file name and press the **TAB** key.
  - Type **[CONTROL]-[ALT]-[DEL]** and the shell will present a menu of commands.
  - Type **[CONTROL]-[D]** and the shell will present a menu of commands.
  - Type **[ALT]-[F2]** the shell will present a menu of commands.
  - You can type the first part of the command or file name and press the **ALT** key.

49. How many arguments and options are there to the command:

```
cal -yj 1752
```

- a. Two arguments, one of which is a single option and the other is a pathname.
- b. Two arguments, neither of which is an option.
- c. Three arguments, one of which contains options and one is a pathname.
- d. Two command line arguments, one of which contains two options.
- e. A single numeric option and a three-letter file name.

50. Which **bash** command sequence correctly searches for the **chars** and then prints **OK** if it is found inside the password file?

- a. **grep chars </etc/passwd && echo OK**
- b. **grep chars >/etc/passwd && echo OK**
- c. **grep chars >/etc/passwd || echo OK**
- d. **grep chars </etc/passwd || echo OK**
- e. **grep chars /etc/passwd || echo OK**

51. If **/bin/pig** is a program that outputs **hi** and **/usr/bin/pig** is a program that outputs **foo** what is the output of this shell command sequence: **PATH=/etc:/usr/bin:/bin ; pig**

- a. **hi**
- b. **foo**
- c. **foo** followed by **hi**
- d. **hi** followed by **mom**
- e. **bash: pig: command not found**

52. What is the output of the following sequence of **bash** commands:

```
false && echo "linux      rocks $?"
```

- a. **linux rocks 0**
- b. no output
- c. **linux rocks 1**
- d. **linux rocks 0**
- e. **linux rocks 1**

53. Which command sequence below outputs only lines 10-15 of the Unix password file?

- a. **head -10 /etc/passwd | tail -5 /etc/passwd**
- b. **head -15 /etc/passwd | tail -5 /etc/passwd**
- c. **tail -15 /etc/passwd | head -5**
- d. **tail -10 /etc/passwd | head -15 /etc/passwd**
- e. **head -15 /etc/passwd | tail -6**

54. In an empty directory, what is the length of the longest file name created by the following **bash** shell two-command sequence:

```
ok='1 12 123 1234' ; touch '$ok'
```

- a. 4 characters
- b. 2 characters
- c. 1 character
- d. 13 characters
- e. 3 characters

55. If **/etc/passwd** is a file name, which of the following pathnames always leads to the same file?

- a. **/etc/.../.../passwd**
- b. **/etc/passwd/.../..**
- c. **.../etc/passwd**
- d. **/etc/passwd/.**
- e. **./etc/passwd**

56. If file **/a** contains 20 lines, and file **/b** contains 30 lines, then how many lines are in file **/c** after this sequence of shell commands:

```
sort /a /b >/c ; cat /a >>/b ; sort /c /b /a  
>/c
```

- a. no lines (empty file)
- b. **120**
- c. **50**
- d. **70**
- e. **80**

57. If file **foo** contains nine lines, each of which is the one-digit line number of the line in the file (1 through 9), what is the output of this command:

```
cat foo foo | cat | tail -4 | head -1
```

- a. **9**
- b. **5**
- c. **8**
- d. **7**
- e. **6**

58. If file **/a** contains 40 lines, and file **/b** contains 60 lines, then how many lines are output by this command:

```
sort /a /b | cat /a | cat /b
```

- a. **40**
- b. **60**
- c. **200**
- d. **160**
- e. **100**

59. If **a=xxx** and **b=yyy** then what is the output of the following sequence of **bash** commands: `if $a = $b ; then echo $a ; fi`
- test: xxx: integer expression expected**
  - test: \$a: integer expression expected**
  - bash: xxx: command not found**
  - xxx**
  - no output**
60. What is the output of the following sequence of **bash** commands:  
`x=0 ; test $x ; echo $?`
- test: \$x: integer expression expected**
  - no output**
  - the number 0 or 1 followed by another 0 or 1 on a new line**
  - 0**
  - 1**
61. Which Unix command sequence deletes a directory and everything inside it?
- deltree -all dir**
  - rm -all dir**
  - rmdir -r dir**
  - rm -r dir**
  - rmdir -all dir**
62. What is the **bash** shell output of this command sequence:  
`true && echo Hello There $?`
- Hello There ?**
  - no output**
  - Hello There 1**
  - Hello There ?**
  - Hello There 0**
63. What is the output of this sequence of three shell commands:  
`umask 674 ; touch newfile ; ls -l newfile`
- w--wrxr-x 1 me me 0 Feb 20 07:55 newfile**
  - rw-rwrxr-- 1 me me 0 Feb 20 07:55 newfile**
  - x----wx 1 me me 0 Feb 20 07:55 newfile**
  - w- 1 me me 0 Feb 20 07:55 newfile**
  - rw-rw-r-- 1 me me 0 Feb 20 07:55 newfile**
64. What is the **bash** shell output of this two-command sequence if run in a directory containing 888 files with names that are all the numbers from 1 to 888 inclusive:  
`cow="*" ; echo '$cow'`
- '\$cow'**
  - \$cow**
  - the file names 1 through 888**
  - the file names 1 through 888, surrounded by quotes**
  - \***

65. What is the output of this command sequence:  
`echo pig >one ; echo cow | head -2 one`
- pig**
  - cow**
  - an error message**
  - pig followed by cow**
  - cow followed by pig**
66. If **x=cow** and **y=dog** then what is the output of the following sequence of **bash** commands: `[ $x = cow -a $y = cow ] ; echo $?`
- no output**
  - test: \$x: integer expression expected**
  - 1**
  - 0**
  - the number 0 or 1 followed by another 0 or 1 on a new line**
67. How many arguments and options are there to the command:  
`wc -l <infile`
- Two arguments, one of which is a single option name and the other is a pathname.**
  - Three arguments, one of which contains an option and one is a pathname.**
  - A file name starting with a dash and an **<infile** switch option argument.**
  - One command line argument containing one option name.**
  - Two arguments, neither of which is an option.**
68. Which of the following **bash PATH** statements makes the most sense?
- PATH=/bin:/bin/cat:/usr/bin**
  - PATH=/bin:/usr/bin:/etc/passwd**
  - PATH=/bin/sh:/usr/bin:/etc:/bin**
  - PATH=/bin/ls:/etc:/usr/bin**
  - PATH=/bin:/usr/bin:/etc**
69. If **a=cow** and **b=pig** then what is the output of the following sequence of **bash** commands: `[ $a = pig -o $b = pig ] ; echo $?`
- 0**
  - the number 1 or 0 followed by another 1 or 0 on a new line**
  - test: \$a: integer expression expected**
  - no output**
  - 1**

70. What is the output of the following sequence of **bash** commands:  
`a=cow ; touch $a ; test -z $a ; echo $?`
- the number 1 or 0 followed by another 1 or 0 on a new line
  - no output
  - 1
  - test: \$a: integer expression expected**
  - 0
71. If **a=pig** and **b=dog** then what is the output of the following sequence of **bash** commands: `[ $a = pig -a $b = pig ] ; echo $?`
- the number 1 or 0 followed by another 1 or 0 on a new line
  - test: \$a: integer expression expected**
  - 0
  - 1
  - no output
72. Which of the following statements is true about this shell command line:  
`>bar zoom bar haven`
- Error: The command name is missing from the command line.
  - The command **bar** sees three arguments.
  - The command **bar** sees only two arguments
  - The command **zoom** sees two arguments.
  - The command **zoom** sees three arguments.
73. Which of these statements is true?
- Typing `./script` and `bash script` always give identical results.
  - If `/y` is an empty directory, `echo /y/*` produces an error message.
  - If `/x` is an empty directory, `sort /x/*` produces an error message.
  - The `cat food` command looks up the file name argument `food` in your `$PATH`.
  - Only single quotes are strong enough to stop shell glob (wildcard) patterns from expanding.
74. If directory **dir** contains only these five two-character file names: **a?**, **11**, **?1**, **1\***, **.1**, then which shell command below will remove *only* the single two-character name **?1** from the directory?
- `rm dir/*1`
  - `rm dir/\?1`
  - `rm dir/??`
  - `rm dir/1*`
  - `rm dir/?1`

75. Given my directory **dir** and my file **dir/bar** owned by me, which permissions allow me to delete the file **dir/bar** from the directory, but not change the content (data) in the file?
- Permissions 100 on directory **dir** and 200 on file **dir/bar**.
  - Permissions 300 on directory **dir** and 500 on file **dir/bar**.
  - Permissions 100 on directory **dir** and 100 on file **dir/bar**.
  - Permissions 500 on directory **dir** and 400 on file **dir/bar**.
  - Permissions 300 on directory **dir** and 300 on file **dir/bar**.
76. What is the **bash** shell output of this two-command sequence:  
`cd /home/alleni || echo "In $(pwd)"`
- no output
  - In /home/alleni**
  - "In \$(pwd)"**
  - In 0pwd)**
  - In \$(pwd)**
77. How many arguments are passed to the command by the shell on this command line: `<pig pig -b "-a -r" >pig pig pig`
- 4
  - 6
  - 2
  - 3
  - 5
78. What is the output of the following sequence of **bash** commands:  
`cd /bin && echo "cd $(pwd)"`
- `cd $(pwd)`
  - bash: cd: /bin: No such file or directory**
  - no output
  - `cd 0pwd)`
  - `cd /bin`
79. Given my directory **dir** and my file **dir/foo** owned by me, which permissions allow me to change or create new content (data) in the file **dir/foo** but not delete the file?
- Permissions 600 on directory **dir** and 700 on file **dir/foo**.
  - Permissions 500 on directory **dir** and 600 on file **dir/foo**.
  - Permissions 100 on directory **dir** and 100 on file **dir/foo**.
  - Permissions 200 on directory **dir** and 200 on file **dir/foo**.
  - Permissions 400 on directory **dir** and 400 on file **dir/foo**.

80. What is the output of this sequence of three shell commands:

```
umask 547 ; mkdir newdir ; ls -ld newdir
a. d-w--wxrwx 1 me me 0 Feb 20 07:55 newdir
b. dr--r--rw- 1 me me 0 Feb 20 07:55 newdir
c. dr-xr--rwx 1 me me 0 Feb 20 07:55 newdir
d. d-w--w---- 1 me me 0 Feb 20 07:55 newdir
e. d-w--wx--- 1 me me 0 Feb 20 07:55 newdir
```

81. What is the **bash** shell output of this two-command sequence:

```
cd /etc/passwd && echo "in $(pwd)"
a. in 0pwd)
b. bash: cd: /etc/passwd: Not a directory
c. in $(pwd)
d. no output
e. in /etc
```

82. In an empty directory, what is the shell output of these three commands:

```
touch xx .x xy .y xz ; a='x* y*' ; echo "$a"
a. *x *y
b. xx xy
c. $a
d. x* y*
e. xx xy xz y*
```

83. If **foo** is a script containing the line **TERM=vt100 ; export TERM**, what is the output of the following sequence of **bash** commands:

```
TERM=linux ; ./foo ; echo $TERM
a. linux
b. $TERM
c. foo
d. vt100
e. TERM
```

84. What is the output of this sequence of three shell commands:

```
echo x >abc ; ls >abc abc ; wc abc
a. no output
b. 1 1 4 abc
c. 1 1 2 abc
d. 1 1 3 abc
e. 0 0 0 abc
```

85. If **bar** is an executable script containing the line **cow=pig** then what is the **bash** output of this sequence of three commands:

```
cow=cat ; ./bar ; echo "the '$cow' ate"
a. the 'cat' ate
b. the $cow ate
c. the 'cow' ate
d. the 'pig' ate
e. the '$cow' ate
```

86. What is the **bash** shell output of this two-command sequence if run in a directory containing 123 files with names that are all the numbers from 1 to 123 inclusive: **bat="\* ; echo "\$bat"**

- a. the file names 1 through 123, surrounded by quotes
- b. \*
- c. "\$bat"
- d. the file names 1 through 123
- e. \$bat

87. In an empty directory, what is the shell output of these three commands:

```
touch .1 .2 .3 11 12 ; a='1* .2*' ; echo '$a'
a. 11 .1 12 .2
b. '.1* .2*'
c. .1 .2
d. $a
e. .1* .2*
```

88. In an empty directory, what is the length of the longest file name created by the following **bash** shell two-command sequence:

```
var='1 12 123 1234 12345' ; touch '$var'
a. 2 characters
b. 4 characters
c. 3 characters
d. 1 character
e. 13 characters
```

89. What is the **bash** shell output of this two command sequence:

```
PATH=/bin/ls:/bin/head:/bin/sh ; head
nosuchfile
a. ls: /bin/head: command not found
b. bash: /bin/ls: command not found
c. bash: /bin/sh: No such file or directory
d. bash: head: command not found
e. head: nosuchfile: No such file or directory
```

90. If **foo** were a file of text containing 50 different lines, what would be the output of this exact command line: **diff foo foo**
- an error message because **diff** doesn't allow the same file name twice
  - several lines, which are the lines that are different between the two files
  - an error message because **diff** only allows one file name
  - the contents of file **foo** would be displayed
  - no output
91. If **dog=12** and **cat=99** then which of the following **bash** command lines outputs only the word **hi** (and nothing else)?
- [dog -ne cat] || echo hi**
  - [!dog = cat] && echo hi**
  - [ dog = dog ] && echo hi**
  - [dog!=dog] || echo hi**
  - [ dog -ne cat ] && echo hi**
92. Which of the command lines below can generate a non-empty file?
- tail -5 /a/b >/a/b**
  - grep -v /a/b /a/b >/a/b**
  - tr abc ABC </a/b >/a/b**
  - sort -r /a/b >/a/b**
  - ls /a/b >/a/b**
93. If **x=5** and **y=5**, which **bash** command sequence correctly compares the two numbers as equal and prints **OK**?
- if test x -eq y ; then echo OK ; fi**
  - if ( x == y ) ; then echo OK ; fi**
  - if [ x = y ] ; then echo OK ; fi**
  - if test \$x -eq \$y ; then echo OK ; fi**
  - if [ \$x==\$y ] ; then echo OK ; fi**
94. What is the **bash** output of this command sequence:  
**false && echo "Hello There"**
- "Hello There"**
  - no output
  - Hello There**
  - HelloThere**
  - Hello There**
95. What is the output of the following sequence of **bash** commands:  
**x=cow ; y=dog ; test -z \$x ; echo \$?**
- no output
  - the number 0 or 1 followed by another 0 or 1 on a new line
  - test: \$x: integer expression expected**
  - 0**
  - 1**

96. If variable **bar** might contain nothing (a null value - defined but empty), which **bash** command sequence correctly tests for this and prints **YO**?
- if [ ''\$bar'' = ' ' ] ; then echo YO ; fi**
  - if [ \$bar -eq : ] ; then echo YO ; fi**
  - if [ \$bar -eq "" ] ; then echo YO ; fi**
  - if [ "\$bar" = "" ] ; then echo YO ; fi**
  - if [ "\$bar" = \* ] ; then echo YO ; fi**
97. Which line below puts the count of the number of lines in the password file into the variable **foo**?
- foo=\$( cat -c /etc/passwd )**
  - foo=[ wc /etc/passwd | echo \$1 ]**
  - foo=[ cat -l /etc/passwd ]**
  - foo=[ grep -c /etc/passwd ]**
  - foo=\$(( wc -l </etc/passwd )**
98. A shell script named **foo** is executed as follows:  
**./foo a "b c d" e**  
Inside the script is the line: **echo "\$2"**  
What is the output from this line?
- \$2**
  - b**
  - a bash error message: unbound (undefined) variable
  - b c d**
  - "b**
99. If **a=cow** and **b=dog** then what is the output of the following sequence of **bash** commands linked by **&&**:  
**[ \$a = dog -o \$b = dog ] && echo \$?**
- no output
  - 0**
  - 1**
  - test: \$a: integer expression expected**
  - the number 1 or 0 followed by another 1 or 0 on a new line
100. What is the output of the following sequence of **bash** commands:  
**x=1 ; y=2 ; test \$x -le \$y ; echo \$?**
- 1**
  - 0**
  - test: \$x: integer expression expected**
  - no output
  - the number 0 or 1 followed by another 0 or 1 on a new line

101. What is the **bash** shell output of this two-command sequence:

```
cd /bin && echo "echo $(pwd)"
```

- a. echo /bin
- b. echo 0pwd)
- c. echo \$(pwd)
- d. no output
- e. /bin

102. What is the output of this sequence of three shell commands:

```
umask 457 ; mkdir newdir ; ls -ld newdir
```

- a. d-wx-w---- 2 me me 512 Oct 1 1:12 newdir
- b. dr-xr-xrwx 2 me me 512 Oct 1 1:12 newdir
- c. dr--r-xrwx 2 me me 512 Oct 1 1:12 newdir
- d. d-wx-w-rwx 2 me me 512 Oct 1 1:12 newdir
- e. d-w---- 2 me me 512 Oct 1 1:12 newdir

103. If directory **/dir** contains these three four-character file names: **.123**, **.124**, **.???**, then what is the output of the following **bash** shell command line: **echo /dir/????**

- a. no output
- b. /dir/.123 /dir/.124
- c. echo: /dir/????: No such file or directory
- d. /dir/.123 /dir/.124 /dir/.???
- e. /dir/????

104. If **cow=5** and **dog=5**, which **bash** command sequence correctly compares the two numbers as equal and prints **OK**?

- a. if [ \$cow==\$dog ] ; then echo OK ; fi
- b. if test cow -eq dog ; then echo OK ; fi
- c. if test \$cow -eq \$dog ; then echo OK ; fi
- d. if [ cow = dog ] ; then echo OK ; fi
- e. if ( cow == dog ) ; then echo OK ; fi

105. If **x=cow** and **y=dog** then what is the output of the following sequence of **bash** commands: **[ \$x = dog -o \$y = cow ] ; echo \$?**

- a. the number 0 or 1 followed by another 0 or 1 on a new line
- b. no output
- c. test: \$x: integer expression expected
- d. 1
- e. 0

106. How many arguments are passed to the command by the shell on this command line: **<bar bar -b "-a" '-r' >bar bar bar**

- a. 6
- b. 4
- c. 5
- d. 3
- e. 2

107. Which **bash** command sequence correctly searches for the **chars** and then prints **OK** if it is found inside the password file?

- a. if test chars = /etc/passwd ; then echo OK ; fi
- b. if grep chars /etc/passwd ; then echo OK ; fi
- c. if [ grep chars /etc/passwd ] ; then echo OK ; fi
- d. if [ test chars /etc/passwd ] ; then echo OK ; fi
- e. if test chars /etc/passwd ; then echo OK ; fi

108. What is the **bash** shell output of this two-command sequence:

```
cd /home/alleni && echo "In $(pwd)"
```

- a. "In \$(pwd)"
- b. In \$(pwd)
- c. no output
- d. In /home/alleni
- e. In 0pwd)

109. What is the **bash** shell output of this command sequence:

```
true && echo space      junk $?
```

- a. no output
- b. space junk ?
- c. space junk ?
- d. space junk 1
- e. space junk 0

110. Given the following **bash** shell command line:

```
read xx yy zz
```

which user keyboard input line below will assign the text **22** to the shell variable named **yy**?

- a. 11 22 33
- b. 11:22:33
- c. xx=11 yy=22 zz=33
- d. 11;22;33
- e. 11,22,33

111. If **/bin/foo** is a program that outputs **hi** and **/usr/bin/foo** is a program that outputs **mom** what is the output of this shell command sequence: **PATH=/etc:/usr/bin:/bin ; foo**
- hi**
  - mom** followed by **hi**
  - mom**
  - bash: foo: command not found**
  - hi** followed by **mom**
112. If **/etc/passwd** is a file name, which of the following pathnames always leads to the same file?
- ././etc/passwd**
  - /etc/passwd/..**
  - /etc/.../passwd**
  - ./.../etc./passwd**
  - /etc/passwd/.../**
113. Which command line below does not show any lines from inside the file **dog**?
- more dog**
  - head dog**
  - ls dog**
  - tail dog**
  - less dog**
114. What is the output of the following sequence of **bash** commands:  
**false && echo "foo bar \$?"**
- foo bar 1**
  - foo bar 0**
  - foo bar 0**
  - no output
  - foo bar 1**
115. Which of the following shell command lines displays the names in the current directory that are exactly three numeric digits long (and nothing else)?
- echo [1-31-31-3]**
  - echo ???**
  - echo [0-9][0-9][0-9]**
  - echo [0-90-90-9]**
  - echo [1-3][1-3][1-3]**

116. Which **bash** command sequence correctly compares the two numbers and prints **OK**?
- if ( ! 4 < 3 ) ; then echo OK ; fi**
  - if [ 4 > 3 ] ; then echo OK ; fi**
  - if ( let 4 > 3 ) ; then echo OK ; fi**
  - if [ ! 4 <= 3 ] ; then echo OK ; fi**
  - if [ 4 -gt 3 ] ; then echo OK ; fi**
117. Given the following **bash** shell command line:  
**read hi my ok**  
which user keyboard input line below will assign the text **two** to the shell variable named **my**?
- one,two,three**
  - "one" "two" "three"**
  - one two three**
  - <one <two <three**
  - hi=one my=two ok=three**
118. What is in the file named **file** after this command sequence:  
**echo a >x ; echo b >>x ; mv x y >file**
- no such file (nonexistent file)
  - b**
  - a** followed by **b**
  - a**
  - nothing - **file** is empty - no data
119. What is the output of the following sequence of **bash** commands:  
**cd /etc && echo "in \$(pwd)"**
- bash: cd: /etc: No such file or directory**
  - in /etc**
  - in \$(pwd)**
  - no output
  - in 0pwd)**
120. If **foo** is a script containing the line **TERM=linux ; export TERM**, what is the output of the following sequence of **bash** commands:  
**TERM=vt100 ; ./foo ; echo "\$TERM"**
- \$TERM**
  - foo**
  - vt100**
  - TERM**
  - linux**

121. If **a=cow** and **b=dog** then what is the output of the following sequence of **bash** commands: [ \$a = dog -o \$b = cow ] ; echo \$?
- the number 1 or 0 followed by another 1 or 0 on a new line
  - 0
  - 1
  - no output
  - test: \$a: integer expression expected**
122. Which of the following shell command lines displays all the names in the current directory that are exactly three letters (alphabetic) long (and nothing else)?
- echo [azAZ][azAZ][azAZ]**
  - echo ???**
  - echo [a-zA-Z][a-zA-Z][a-zA-Z]**
  - echo [a-zA-Za-zA-Za-zA-Z]**
  - echo [a,zA,Z][a,zA,Z][a,zA,Z]**
123. Which of the following statements is true about this shell command line:  
**>foo file bar haven**
- Error: The command name is missing from the command line.
  - The command **file** sees three arguments.
  - The command **foo** sees only two arguments
  - The command **file** sees two arguments.
  - The command **foo** sees three arguments.
124. Select the correct **bash** shell order of command line processing:
- aliases, variables, globs, redirection
  - aliases, globs, variables, redirection
  - redirection, aliases, globs, variables
  - aliases, variables, redirection, globs
  - aliases, redirection, variables, globs
125. If my current working directory is **/home**, and my home directory is **/home/me**, which of the following commands copies the Unix password file into my home directory under the name **foo**?
- cp ../home/me/.../etc/passwd ./me./foo**
  - cp me/.../etc/passwd me/foo**
  - cp .../etc/passwd /me/foo**
  - cp ./me/.../etc/passwd .../home/me/foo**
  - cp .../etc/passwd .../me/foo**

126. If **pig=12** and **cat=99** then which of the following **bash** command lines outputs only the word **hi** (and nothing else)?
- [ pig -eq 12 ] || echo hi
  - [ pig = pig ] && echo hi
  - [ pig -ne cat ] && echo hi
  - [!pig = cat] && echo hi
  - [pig!=pig] || echo hi
127. Which of these commands makes a file owned by me, also executable by me?
- chmod x+u myfile**
  - chmod u+x ./myfile**
  - chmod x=u ./myfile**
  - umask 777 myfile**
  - umask 111 myfile**
128. What is the output of this command sequence:  
**echo dog >one ; echo cow | head -2 one**
- cow**
  - dog**
  - dog** followed by **cow**
  - cow** followed by **dog**
  - an error message
129. Which command sequence below outputs only lines 11-15 of the Unix password file?
- head -15 /etc/passwd | tail -5 /etc/passwd**
  - head -15 /etc/passwd | tail -5**
  - tail -15 /etc/passwd | head -10**
  - tail -10 /etc/passwd | head -15 /etc/passwd**
  - head -10 /etc/passwd | tail -15 /etc/passwd**
130. If file **foo** contains nine lines, each of which is the one-digit line number of the line in the file (1 through 9), what is the output of this command:  
**cat foo foo | cat | tail -5 | head -1**
- 8**
  - 7**
  - 5**
  - 9**
  - 6**

131. If file **foo** contains nine lines, each of which is the one-digit line number of the line in the file (1 through 9), what is the output of this command:

```
cat foo foo | sort -r | head -5 | tail -1
```

- 9**
- 8**
- 7**
- 5**
- 6**

132. If the file **pig** contained the word **foo**, what would be the **bash** shell output of this two command sequence:

```
PATH=/etc/passwd:/bin/ls:/bin/cat ; /bin/ls pig
```

- foo**
- pig**
- no output
- bash: /bin/ls: command not found**
- /bin/ls: pig: No such file or directory**

133. What is the output of the following sequence of **bash** commands:

```
x=1 ; touch x ; test ! -z $x ; echo $?
```

- no output
- the number 1 or 0 followed by another 1 or 0 on a new line
- test: \$x: integer expression expected**
- 0**
- 1**

134. Which **bash** command sequence below always outputs just the date only if the first argument is either a file or a directory?

- if [ -f -o -d "\$1" ]; then date ; fi**
- if [ "\$1" -eq -f -o "\$1" -eq -d ]; then date ; fi**
- if [ -f || -d "\$1" ]; then date ; fi**
- if [ "-f \$1" || "-d \$1" ]; then date ; fi**
- if [ -f "\$1" -o -d "\$1" ]; then date ; fi**

135. What is the **bash** shell output of this command sequence:

```
false && echo "linux      rocks $?"
```

- no output
- linux rocks 0**
- linux rocks 0**
- linux rocks 1**
- linux rocks 1**

136. How many arguments are passed to the command by the shell on this command line: **<cow cow "-x" -y '-z' >cow cow**

- 2**
- 5**
- 4**
- 3**
- 6**

137. If **x=pig** and **y=dog** then what is the output of the following sequence of **bash** commands: **if \$x = \$y ; then echo \$y ; fi**

- no output
- dog**
- test: \$x: integer expression expected**
- bash: pig: command not found**
- test: pig: integer expression expected**

138. If **happy** were a file of text containing 50 different lines, what would be the output of this exact command line: **diff happy happy**

- the contents of file **happy** would be displayed
- no output
- several lines, which are the lines that are different between the two files
- an error message because **diff** doesn't allow the same file name twice
- an error message because **diff** only allows one file name

139. In an empty directory, what is the **bash** shell output of this three-command sequence:

```
touch aa .a ab .b .c ; x='.* .b*' ; echo '$x'
```

- .a\* .b\***
- \$x**
- aa .a ab .b**
- .a .b**
- '.\* .b\*'**

140. What is the output of the following sequence of **bash** commands:

```
x=cow ; y=dog ; touch $x ; test -z $x ; echo $?
```

- 0**
- 1**
- no output
- test: \$x: integer expression expected**
- the number 0 or 1 followed by another 0 or 1 on a new line

141. Which of the command lines below can generate a non-empty file?

- sort -r /out >/out**
- tail -5 /out >/out**
- grep -v /out /out >/out**
- ls /out >/out**
- tr abc ABC </out >/out**

142. What is the link count of file **foo** after this set of successful commands?

```
rm foo ; touch foo ; ln foo bar
cp bar x ; ln x y ; ln bar z ; ln z a
a. 4
b. 1
c. 3
d. 2
e. 5
```

143. What is the **bash** shell output of this two-command sequence if run in a directory containing 765 files with names that are all the numbers from 1 to 765 inclusive: **foo="\*"** ; **echo \$foo**

- a. all the file names that start with an asterisk ('\*)
- b. **\$foo**
- c. the file names 1 through 765
- d. \*
- e. an asterisk ('\*) and the file names 1 through 765

144. Given my directory **dir** and my file **dir/bar** owned by me, which permissions allow me to change or create new content (data) in the file **dir/bar** but not delete the file?

- a. Permissions 600 on directory **dir** and 700 on file **dir/bar**.
- b. Permissions 500 on directory **dir** and 600 on file **dir/bar**.
- c. Permissions 200 on directory **dir** and 200 on file **dir/bar**.
- d. Permissions 400 on directory **dir** and 400 on file **dir/bar**.
- e. Permissions 100 on directory **dir** and 100 on file **dir/bar**.

145. Which command line below does not show any lines from inside the file **pig**?

- a. **more pig**
- b. **head pig**
- c. **less pig**
- d. **ls pig**
- e. **tail pig**

146. Which of the following shell command lines displays only the names in the current directory that are exactly three numeric digits long?

- a. **echo '[0-9][0-9][0-9]'**
- b. **echo [0-9][0-9][0-9]**
- c. **echo [1-3][1-3][1-3]**
- d. **echo ???**
- e. **echo '0-9'0-9'0-9'**

147. If file **foo** contains nine lines, each of which is the one-digit line number of the line in the file (1 through 9), what is the output of this command:

```
cat foo foo | sort -r | head -4 | tail -1
```

- a. 7
- b. 6
- c. 5
- d. 9
- e. 8

148. If **a=1** and **b=2** then which of the following **bash** command lines outputs only the word **hi** (and nothing else)?

- a. **[!a = b] && echo hi**
- b. **[a!=a] || echo hi**
- c. **[a -ne b] || echo hi**
- d. **[ a = a ] && echo hi**
- e. **[ a -ne b ] && echo hi**

149. Which **bash** command sequence below always outputs just the date only if the first argument is both not empty and a directory?

- a. **if [ "\$1" -eq -f -a "\$1" -eq -d ]; then date ; fi**
- b. **if [ "-s \$1" && "-d \$1" ]; then date ; fi**
- c. **if [ -s && -d "\$1" ]; then date ; fi**
- d. **if [ -d "\$1" -a -s "\$1" ]; then date ; fi**
- e. **if [ -s -a -d "\$1" ]; then date ; fi**

150. If the file **foo** contained the word **mom**, what would be the **bash** shell output of this two command sequence:

```
PATH=/etc/passwd:/bin/ls:/bin/cat ; /bin/ls foo
```

- a. **foo**
- b. **/bin/ls: foo: No such file or directory**
- c. **mom**
- d. no output
- e. **bash: /bin/ls: command not found**

151. If variable **cow** might contain nothing (a null value - defined but empty), which **bash** command sequence correctly tests for this and prints **OK**?

- a. **if [ ''\$cow'' = '''' ] ; then echo OK ; fi**
- b. **if [ "\$cow" = \* ] ; then echo OK ; fi**
- c. **if [ "" = "\$cow" ] ; then echo OK ; fi**
- d. **if [ \$cow -eq "" ] ; then echo OK ; fi**
- e. **if [ \$cow -eq : ] ; then echo OK ; fi**

152. What is the output of the following sequence of **bash** commands:

```
date='October Monday' ; test date = date
```

- a. **test: too many arguments**
- b. 0
- c. no output
- d. 1
- e. **Mon Oct 27 17:01:38 EST 2003**

153. In an empty directory, what is the shell output of these three commands:

```
touch xx .x xy .y xz ; x='x* y*' ; echo "$x"
```

- a. **\$x**
- b. **\*x \*y**
- c. **x\* y\***
- d. **xx xy xz y\***
- e. **xx xy**

154. What minimal permissions must you have on a directory to be able to execute successfully the command **ls .** from *inside* the directory?

- a. **rwx**
- b. **---x**
- c. **r-x**
- d. **r--**
- e. **-wx**

155. If **bar** is an executable script containing the line **foo=dog** then what is the **bash** output of this sequence of three commands:

```
foo=cat ; ./bar ; echo "the '$foo' ate"
```

- a. **the 'foo' ate**
- b. **the 'dog' ate**
- c. **the '\$foo' ate**
- d. **the \$foo ate**
- e. **the 'cat' ate**

156. Which **bash** command line below allows programs in the current directory to execute without preceding the names with **./**?

- a. **PATH=./:\$HOME:/usr/bin**
- b. **\$PATH=.:\$HOME:/usr/bin**
- c. **PATH=/usr/bin:\$HOME:.**
- d. **PATH=/usr/bin/.:\$HOME**
- e. **\$PATH=/usr/bin:./\$HOME**

157. Which line below passes three *separate* arguments to the **sort** command when placed inside a shell script named **foo** invoked by the command line:

```
./foo 111 222 333
```

- a. **sort "\$? \$? \$?"**
- b. **sort "\$1 \$2 \$3"**
- c. **sort "\$\*"**
- d. **sort "\$@"**
- e. **sort "\$#"**

158. Given this long listing:

```
drwxr-xr-x 2048 bin bin 4096 Jan 2 14:22 /dir
```

How many subdirectories lie immediately under **/dir**?

- a. there is not enough information shown to answer the question
- b. 2048
- c. 2046
- d. 4094
- e. 4096
